

Md Shoieb Hossain

Dhaka, Bangladesh · 01719284739 · shoiebdurjoy@gmail.com · github.com/shoiebdurjoy · linkedin.com/in/shoieb-durjoy-01a942234/

Professional Summary

Computer Science graduate with hands-on experience building modular software projects, AI integrations, backend applications, and containerized deployment environments. Proficient in Python, SQL, and TypeScript, with a strong focus on structured software architecture, database design, and real-time systems. Backed by solid problem-solving skills and experience collaborating on full-stack projects.

Technical Skills

Programming Languages: Python, TypeScript, JavaScript, SQL

Frameworks & Libraries: React.js, Flask, Flask-SocketIO, Flask-SQLAlchemy, SQLAlchemy, Vite, TailwindCSS

Databases: PostgreSQL, MySQL

AI & Machine Learning: PyTorch, OpenAI API, OpenRouter

DevOps & Deployment: Docker, Vercel, Render

Version Control: Git, GitHub

Security & APIs: Google Maps API, Twilio API, Alexa Integration, Kali Linux, Basic Penetration Testing

Operating Systems: Linux, Windows

Featured Projects

DurjoyAI – Personal AI Assistant | TypeScript, Docker, OpenRouter, OpenAI/Gemini API, Alexa Integration Jan 2026 – Present

- Designed and implemented a modular AI assistant architecture utilizing TypeScript, implementing a provider abstraction layer to support multiple LLM backends (OpenAI, Gemini, OpenRouter).
- Designed the “Brain 0” owner-profile storage layer, implementing a repository pattern to persist and load user context, personal preferences, and automated goals.
- Built an Alexa voice integration webhook endpoint featuring request signature verification and security compliance.
- Containerized the application with Docker and configured environment-based deployment settings to streamline local and production execution.

Smart Emergency System (EMERGON) | Python, Flask, Socket.IO, React, PostgreSQL, Google Maps/Twilio/OpenAI APIs Spring 2026

- Worked within a four-member team to design and build a full-stack emergency help and coordination system using Python, Flask, React.js, and PostgreSQL.
- Collaborated on implementing user authentication, real-time messaging, and WebSocket-based socket events for emergency status coordination.
- Contributed to integrating the Twilio API for automated SMS notifications and the Google Maps API for real-time location mapping of emergency requests.
- Assisted in developing data models with SQLAlchemy and deploying the backend to Render and frontend to Vercel using Docker.

Bachelor’s Thesis: Emotion Recognition in Bangla | Python, PyTorch, Librosa, CUDA, Kaggle, LaTeX 2025 – Present

- Preparing and curating a Bangla multimodal emotion recognition dataset through video/audio clipping, preprocessing, and emotion annotation.
- Training and testing deep learning models for Bangla audio-centric emotion recognition using PyTorch, CUDA, and Kaggle GPU-accelerated environments.
- Implementing audio feature extraction workflows using Python, Librosa, and signal preprocessing pipelines.
- Conducting ongoing data analysis, documenting experimental workflows, and authoring the technical thesis report using LaTeX.

Professional Experience

Think Big Brand | Video Editor (Part-Time) 3-Year Engagement

- Collaborated with production team members and clients to deliver video content under tight deadlines, managing iterations and client revisions.
- Streamlined editing workflows to incorporate client feedback efficiently while maintaining quality and delivery standards.

Education

BRAC University | B.S. in Computer Science (Major: Computer Science) – CGPA: 3.00/4.00 Expected 2026

Milestone College | Higher Secondary Certificate (HSC) – Grade: GPA 5.00/5.00 2022

Certifications

Introduction to DevOps – IBM (Coursera) · **Web Development (Advanced Level)** – BRAC University

Achievements

Second Prize – Bangladesh Securities and Exchange Commission (BSEC) Competition

Languages

Bangla (Native) · **English** (Professional Working Proficiency) · **Spanish** (Basic – Completed SPN101 Coursework at BRAC University)
